We are Think Huge, a very versatile company, with several brands around server infrastructure, our main core business is on the VPS for trading sector, but we're building other brands around the financial sector. We own brands like ForexVPS, FXVM, HowtoTrade, AlgoBuilder, PingPlayers.

We're looking for a Full Stack developer, or someone with good knowledge of backend and some experience on frontend to fill a gap on our team, currently we are a team of 9 developers + 1 QA, most of our team is from a frontend background and the remaining are full stack.

Position Overview:

As a Full Stack Developer at Think Huge , you will play a crucial role in the development and maintenance of our hosting infrastructure, as well as creating and enhancing web applications. Your responsibilities will include collaborating with cross-functional teams, designing and implementing software solutions, and ensuring the scalability, performance, and reliability of our systems.

Key Responsibilities:

- Develop and maintain websites/web apps with user experience and conversion optimization as the core objective
- Always adhere to the best practices regarding security, make sure that the code produced is up to the best standards for maintainability
- QA your own work and strive to constantly improve
- Working across all our brands to improve their performance and overall quality
- Delivering tasks within assigned deadlines
- Making sure the code is consistent with our company standards
- Performing cross-code review for other members of the team
- Coming up with simple solutions to complex problems
- Making sure a page/product component you developed is performing well across all major popular devices
- Making sure a task is developed with the design in mind and consistent with it
- Active participation in the team's company refinement and brainstorming sessions
- Support team's processes using Agile frameworks
- Bringing ideas to achieve organizational goals

- Optimizing products so they are ensuring the best customer experience
- Balancing the functionality of code with how it's written
- Ensure clear lines of communication with colleagues at all times (mic, webcam)
- Working closely with your colleagues to ensure you have common ground on tasks

Why Join Us?

- Work in a fully remote (with UK-based hours), global team that values flexibility and efficiency - no endless Zoom meetings, just focused collaboration.
- Play a key role in helping to drive growth across a diverse portfolio of brands.
- Have the freedom and autonomy to manage your work while making a real impact.
- Be part of a company that is constantly innovating, moving fast, and embracing the latest technology and trends.
- Enjoy a culture of collaboration, ownership, and fun in a growing, fast-paced environment.
- This is a full-time role with enormous potential for career progression. As we expand rapidly, we invest significantly in both external and internal training, fostering your professional development. You will have the opportunity to grow alongside the company, making an impact on both the creative and business sides of the organization.
